

08.10.2002 - Stacking laminated boards

Dekker Hout Warmond B.V.

Kallfass will deliver the company **Dekker Hout Warmond B.V.** an stacking mechanisation for laminated and no-laminated boards at the middle of october.

These mechanisation is standing after a shrinking line, which will laminate the boards.

The boards will be feeded to the first stacker over a roller conveyor with tranverse removal, will be stacked to small pakets and and strapped twice. After the strapping the small pakets will be stacked ready for dispatch at euro pallets.

The lengths of the boards are between approx. 600 and 3000 mm, the width between approx. 150 - 600 mm.

The material thickness is between approx.

18 - 38 mm, the maximum boards in one small paket are 5. It is possible to work on that line with max. 22 boards / min.

The company **Dekker Hout Warmond B.V.** will be delivered two more lines at okt./nov. this year, which will be glueing mechanisations.
