

19.09.2002 - Double-crosscut-saw for milled round timber

WEMA PROBST

In week 39 we will deliver to the firm **WEMA PROBST** a double-crosscut-saw for round timber processing. The double-crosscut-saw will be feeded automatically and is standing after a round shaper machine, the round timber will be hand over from an cone conveyor to our saw.

It is possible to cut between 3 and 5 round timbers per minute, the dimensions starting from a length from 1000 mm up to 3000 mm and at the diameter from 200 mm up to 250 mm.

As soon as the timbers will be angled at the double-crosscut-saw they will be hand over to an feeding conveyor of the pfofile machine.

For further informations please contact us directly by [phone](tel:0049-7442-84460) or by e-mail: info@kallfass-online.com
